

# FOUR SQUARE SOCCER

Make four goals in each corner of the gym. The short line is the goal line (A) and the long line in front of it (B) is the goal box line. The goalies can not step in front of the goal box line. Put one team of four players at each goal. The remaining players line-up next to goal #1. Two players are goalies and two players are forwards. The ball always starts at goal #1. Once their forward has kicked the ball into play, the other forwards may come out to play. The object of the game is to score on other team's goals and to try to make it to goal #4 (The King Goal). When a goal is scored on a team, that team is out and they go to the end of the line. The other teams then get to move up a goal. For example, if a goal is scored on goal #3, that team leaves and the team in goal #2 moves to #3 and the team in goal #1 moves to goal #2. A new team of four players moves into goal #1. If a goal is scored on goal #4, then every team gets to move up a goal. If a goal is scored on goal #1, then nobody moves but a new team comes in a goal #1. A team can also be out if there is a handball by one of their forwards, if one of their goalies steps in front of the goal box line or for any other penalties (ie. dangerous play). We also do not let goalies punt the ball if we are playing indoors. After every score or dead ball, we have forwards and goalies switch positions.
